

Intention Science
THE TILLER FOUNDATION

NOTE: The following Precursor Statement was created by Dr. Tiller to help imprinters prepare inwardly for an imprinting session, foster a sense of connection with one another, and invite the support and presence of any spiritual, angelic, celestial, or higher forces they personally choose to include

(Read Aloud The Precursor Cohering Statement “---” denotes a short pause)

Precursor Cohering Statement

Let us tune into each other in this plane of reality. And as we tune in with each other, we invite the presence, cooperation and assistance of (insert any angelic, celestial or higher forces you wish to call in), so that we all become coherent together. And we focus on our hearts, for a moment --- then we move our attention to our solar plexus --- and back to our hearts. --- And then up through our crown chakra and to the sun. And we roam the sun, the spirit and soul levels of the sun. We focus our attention on the substance of the sun, the energies of the sun, the information of the sun, the consciousness of the sun. ---

We draw these aspects all together in one tapestry, one rope-like structure and we bring that rope-like structure back to our crown chakra, down through our hearts and our solar plexus to the center of the earth. And we focus our attention on the substance of the center of the earth, the energy of the center of the earth, the information of the center of the earth, the consciousness of the center of the earth ---

And we weave that entire aspect into an enhanced tapestry so that the rope-like structure becomes larger. And we move this entire aspect up through our solar plexus and out through the left side of our bodies to the moon. And we roam the moon, focusing our attention on the substance of the moon, the energy of the moon, the information of the moon and the consciousness of the moon ---

And we draw all these aspects into this growing tapestry, into this thicker rope-like structure and we draw that back into the left side of our bodies and down to the mid-region of the earth. And we roam the mid-regions of the earth, being involved with the substance of the mid-region of the earth, the energies of the mid-region of the earth, the information of the mid-region of the earth and the consciousness of the mid-region of the earth so that we enhance this growing tapestry that we are weaving together---

And we bring that up to our solar plexus and out the right side of our bodies so that we now join with all the other planets in our solar system. And we explore the other planets of our solar system, the substance of those planets, the energies of those planets, the information of those planets, the consciousness of those planets. ---

And so our tapestry grows and grows and the rope-like structure gets larger and larger. And we bring that totality back to the right side of our bodies to our solar plexus and down to the surface of the earth. And we explore the surface of the earth, enhancing and exploring the substances of the surface of the earth, the energies of the surface of the earth, the information of the surface of the earth, and the consciousness of the surface of the earth. --- And we bring that beautiful, gorgeous, expanded tapestry back up to our solar plexus. So this huge rope-like structure is all together with us. And we lift that total entity to our hearts. And we hold it there in our hearts as we become one. One with each other, one with our much loved (insert any angelic, celestial or higher forces you wish to call in).
